Learning History, Learning Academic Language

Mary J. Schleppegrell, University of Michigan
Overview of the talk

• Learning academic language in the history classroom
• How functional language analysis can support learning history
• Connecting language and meaning
Challenges for English language learners in school

- Learning language
- Learning through language
- Learning about language

(Halliday, 2004)
Functional language analysis

• Developed in Australia based on the work of linguist Michael Halliday

• Looks at the language choices an author makes

• Provides tools for talking about how language makes meaning in history
Supporting academic language development

• Interaction in meaningful contexts of language use

• Explicit focus on how language works

• Engaging deeply with “content”
Language and “content”

- Content is constructed mainly in language
- Each subject has its own ways of using language
- Analyzing and talking about language can help students see how meaning is constructed in English in different subjects
Providing tools for teachers

• A meaning-based language for talking about how language makes meaning in history
• Going beyond vocabulary and general literacy strategies to focus on history discourse
• Helping history teachers support academic language development
Building Academic Literacy through History

“History offers a literacy environment as rich as anyone is likely to encounter prior to college.”

*The Sorcerer’s Apprentice: A Tool for Document-Supported History Instruction*, by Anne M. Britt, et. al

Nancy McTygue, Director  
The History Project at UC Davis
Stacey Greer, Literacy Coordinator  
The History Project at UC Davis
Adam Berman, Director  
Curriculum and Instruction, Grant JUHSD
Challenges of learning history

- History is constructed in language
- The language that constructs it is *academic language*, densely packed with multiple meanings
- Many students are unprepared to read and write academic language
Goals of functional language analysis

• To engage students in conversation about a history text

• To identify the author’s interpretations and judgments

• To help students recognize different patterns of language in history text
Connecting language and meaning

Identify *processes, participants, circumstances*

The *Missouri Compromise* passed in 1820.
Connecting language and meaning

Identify processes, participants, circumstances

The Missouri Compromise passed in 1820.

Process: passed
Connecting language and meaning

Identify processes, participants, circumstances

The *Missouri Compromise* passed in 1820.

Process: *passed*

Participants: *the Missouri Compromise*
Connecting language and meaning

Identify processes, participants, circumstances

The Missouri Compromise passed in 1820.

Process: passed

Participants: the Missouri Compromise

Circumstance: In 1820
The **Missouri Compromise**

Goals of this analysis

- To understand the central issues in the events leading to the Missouri Compromise

- To recognize the different historical points of view on these events

- To recognize how the historian has organized this text to develop information about the **Missouri Compromise**
Asking three questions

• What’s going on in the text?

• What is the author’s perspective?

• How is the text organized?
What’s going on in the text?

- **Action** processes construct events and participants in them

- **Thinking/saying** processes construct perspectives introduced by the author

- **Describing/defining** processes construct background and judgment
The Missouri Compromise text – 1st paragraph

The Missouri Compromise

Many Missouri settlers had brought enslaved African Americans into the territory with them. By 1819 the Missouri Territory included about 50,000 whites and 10,000 slaves. When Missouri applied to Congress for admission as a state, its constitution allowed slavery. In 1819, 11 states in the Union permitted slavery and 11 did not. The Senate—with two members from each state—was therefore evenly balanced between slave and free states. The admission of a new state would upset that balance.
The Missouri Compromise

The Senate—with two members from each state—was therefore evenly balanced between slave and free states. The admission of a new state would upset that balance.
In addition, the North and the South, with their different economic systems, were competing for new lands in the western territories. At the same time, a growing number of Northerners wanted to restrict or ban slavery. Southerners, even those who disliked slavery, opposed these antislavery efforts. They resented the interference by outsiders in Southerner’s affairs. These differences between the North and the South grew into sectionalism—an exaggerated loyalty to a particular region of the country.

What is the author’s perspective?

- Who is represented as having agency in this text?
- Whose words and thoughts are reported?

- **Thinking/feeling process**
- **What is thought or felt**
How is the text organized?

The Missouri Compromise

Many Missouri settlers …… with them. By 1819 the Missouri Territory included …. 10,000 slaves. When Missouri applied to Congress as a state … allowed slavery. In 1819, 11 states in the Union permitted slavery and 11 did not [permit]. The Senate……was therefore evenly balanced ……In addition, the North and the South, …. were competing…… At the same time, a growing number of Northerners wanted to restrict …This proposal, known as the Missouri Compromise, passed in 1820. It preserved the balance ……debate in Congress over slavery.
Seeing patterns in language

- *Time* and *cause* are constructed in *circumstances, connectors, and other language resources*

- Grammatical participants in the text are introduced and then ‘tracked’ with *referrers*, constructed in pronouns, demonstratives, synonyms
Tracking development of ideas

By 1819 the Missouri Territory included about 50,000 whites and 10,000 slaves. When Missouri applied to Congress for admission as a state, its constitution allowed slavery. In 1819, 11 states in the Union permitted slavery and 11 did not. The Senate—with two members from each state—was therefore evenly balanced between slave and free states. The admission of a new state would upset that balance.
Tracking development of ideas

By 1819 the Missouri Territory included about 50,000 whites and 10,000 slaves. When Missouri applied to Congress for admission as a state, its constitution allowed slavery. In 1819, 11 states in the Union permitted slavery and 11 did not. The Senate—with two members from each state—was therefore evenly balanced between slave and free states. The admission of a new state would upset that balance.
Answering the three questions

• What’s going on in the text?
  – What processes, participants, and circumstances are represented?

• What is the author’s perspective?
  – Who has the power to act on others in this text?
  – Whose thoughts, feelings, and words are presented?

• How is the text organized?
  – How are time and cause constructed?
  – How is information introduced and tracked?
Revisiting the goals of the analysis

• To understand the central issues in the events leading to the Missouri Compromise

• To recognize the different historical points of view on these events

• To recognize how the historian has organized this text; what kind of text it is
A meaning-based language for talking about history texts

• *Learning language*: Learning academic English

• *Learning through language*: Learning history

• *Learning about language*: Learning how English works in different texts and contexts
Does it work?

- External evaluation of CHP (Gargani + Co.)
- School districts with high levels of poverty, low achievers, and English language learners
- Students of participating eighth grade teachers compared with students of non-participating teachers (experimental and quasi-experimental design)
- Significant effects on student achievement: CST in social science, English language arts, writing assessment
Learning history, learning academic language

• With support, ELLs can engage with grade-appropriate content and learn academic language
• Talking about the language makes history accessible
• Providing teachers with a language for talking about language gives them powerful tools for engaging students in talk about meaning in history
