CAL collaborates with schools, states, and districts to design and conduct SIOP Model professional development programs that meet their particular needs. Informed by CAL’s ongoing research, our experienced SIOP team can provide a range of services, including workshops, coaching, site visits, and technical assistance. Our team works closely with teachers, professional developers, coaches, administrators, and paraprofessionals as they learn to plan, implement, and support instruction using the SIOP Model.

The CAL SIOP Model professional development series help educators acquire the knowledge base and instructional skills to support English learner achievement in the CCSS by:

- Implementing effective literacy practices for English learners across content areas
- Implementing a robust vocabulary development program
- Developing learner activities that simultaneously promote content knowledge understanding and the corresponding academic language outlined in the CCSS
- Making the language demands of the CCSS explicit to English learners through the development and assessment of language objectives
- Designing higher-order thinking tasks and questions with appropriate language scaffolds
- Creating opportunities for meaningful interaction among students to practice the lesson’s target academic language

The CAL SIOP team can work with you to tailor a plan to meet your specific requirements.

Overview of the SIOP Model
This one-day workshop provides a summary of the SIOP Model and its research base as well as information about how the Model can be articulated with other professional development efforts and how to support SIOP learning and implementation.

SIOP Training of Trainers Workshops for Professional Development Staff and Coaches
Professional development staff and instructional coaches build their knowledge, develop in-house capacity to deliver the SIOP Model, and learn ways to guide others who are developing SIOP expertise. CAL staff support these instructional leaders as they develop and implement a professional development program or coach other teachers.

SIOP Teacher Workshops
In a series of workshops throughout the school year, teachers learn about and practice the eight components of the SIOP Model by engaging in a variety of instructional activities. They plan and implement lessons, reflect on their experiences with other workshop participants, and refine their instructional practices using the SIOP Model.

SIOP Site Visits
Site visits are designed to support teams of teachers as they plan and implement the SIOP Model. CAL works collaboratively with the school or district to design site visits based on teachers’ strengths and needs, with activities including SIOP coaching sessions, deeper exploration of a particular SIOP component, discussion of relevant readings, co-planning sessions, and SIOP lesson study.

Two-Way SIOP Model Professional Development
Two-Way SIOP professional development services combine elements from the SIOP Model of sheltered instruction with best practices for dual language instruction based on our years of research and experience working with two-way immersion programs. All of the professional development options described above are also available for Two-Way SIOP.

Tailored SIOP Professional Development Services
Based on requests by districts and schools, CAL has developed SIOP workshops for content area teachers (e.g., math, science), SIOP refresher workshops, SIOP peer coaching workshops, and SIOP Training of Trainer workshops.

What can the CAL SIOP Team design for you?

Using the SIOP Model: Professional Development Manual for Sheltered Instruction
Updated and Expanded Edition

CAL’s new SIOP professional development manual is designed to assist teacher educators, staff developers, and leaders at the school, district, and state levels as they prepare teachers of English learners to use the Sheltered Instruction Observation Protocol (SIOP) Model or its adapted version, the Two-Way SIOP Model. The manual includes a CD that provides all PowerPoint slides and handouts for use in professional development.

SIOP in Action: Instructional Videos Featuring Complete SIOP Lessons at Three Grade Levels
New Classroom Video with Companion Guide

Three videos, available on one DVD with a companion viewers’ guide, illustrate three SIOP lessons at different grade levels: second grade, eighth grade, and high school/GED. Designed to deepen understanding of SIOP Model implementation at the classroom level and to support professional development initiatives, these videos are also used in CAL SIOP professional development workshops and online learning offerings.
