

It is critical that schools  
Give students the tools  
To analyze and interpret rules  
For them to function  
Successfully in the world  
And be constructive members of society.

At our school a good education is  
**critical** for all students  
We don't accept the I won'ts or  
the I can't do its.  
The **mandate** says that we should  
all be proficient  
Which means we need to work  
hard and be more efficient.  
In order to fit in and **function** in  
society today  
We need to be **constructive** leaders  
and show others the way.
